

To do, Lab-1

```
from google.colab import files  
uploader = files.upload
```

```
import pandas as pd  
import seaborn as sns
```

```
df = pd.read_csv('housing.csv')
```

```
df.describe()
```

```
print(df['Ocean Proximity'].sum())
```

```
df.isnull().sum()
```

To do

```
from google.colab import files  
uploader = files.upload
```

```
diabetes = pd.read_csv('diabetes')
```

```
diabetes.isnull().sum() // no null values
```

```
diabetes.describe() // gives most of the  
summarisation
```
